SUMMARY

Senior UI Designer and Engineer and Design System Lead with **18 years** building component-based systems, tokens, scalable component APIs and product's user interfaces for B2C and B2B SaaS. Delivered coherent interfaces that **improved delivery speed by 70–80%** and **reduced inconsistency by 90%**, while mentoring engineers and driving accessibility, documentation, and technical direction.

Previously active as an open-source developer; in recent years I've focused more on building production design systems and internal platforms used by real product teams.

MOST RECENT EXPERIENCE

LEAD DESIGN ENGINEER — LUALTEK (REMOTE)

DEC 2022 — PRESENT

Lead engineer responsible for the company design system used across multiple digital products.

- Lead the design and engineering of the company design system powering multiple products and teams.
- Product designer on the Lualtek's SaaS (B2C).
- Built a scalable React component library supported by design tokens, theming, and modern CSS/PostCSS architecture.
- Established component APIs, contribution workflows, and documentation standards to improve consistency and developer adoption.
- Implemented synchronisation between **Figma design tokens and frontend components**, reducing UI inconsistencies across products.
- Partner with product, design, and engineering teams to align UX, performance, and maintainability across the platform.
- Mentor engineers and designers on design system usage, accessibility best practices, and scalable UI architecture.

FOUNDER — VIRA SOFTWARE

APR 2015 — PRESENT

Independent software initiative focused on experimental UI tooling and design system infrastructure.

- Designed, built and shipped Vira Theme, very popular VS Code UX
- Designed, built and shipped Vira Design Tokens Explorer, an agentic-driven plugin for VS Code

SENIOR USER INTERFACE ENGINEER — WONDERFLOW (REMOTE)

JUN 2021 — NOV 2022

Design system engineer supporting the company AI analytics platform.

- Led development of the **Wonderflow's design system** used across the product platform and by thousands of customers.
- Built reusable UI components using React, JavaScript/TypeScript, HTML, and modern CSS architecture.
- Introduced **design tokens and shared UI foundations** connecting Figma and frontend implementation.
- Improved interface consistency and reduced duplicated UI implementations across product teams.
- Collaborated with designers and engineers to define component standards, documentation, and usage guidelines.

SENIOR UI ENGINEER — OVAL (REMOTE)

JUN 2019 — MAY 2021

Design system lead and UI engineering specialist.

- Designed and implemented the company design system architecture and reusable component library using React, Figma, Storybook and Next.js for the documentation.
- Led **R&D initiatives** exploring scalable UI patterns and modern frontend technologies.
- Developed reusable UI components accelerating product feature delivery across teams.

TEAM LEADER — CONTACTLAB

MAY 2018 — OCT 2019

- Led a team working on design system architecture and UI development for internal products.
- Defined component guidelines and coordinated implementation between design and engineering teams.
- Improved interface consistency across multiple product modules.

SENIOR USER INTERFACE ENGINEER — CONTACTLAB (REMOTE)

JAN 2017 — OCT 2018

- Designed and implemented internal design system components and UI frameworks.
- Contributed to frontend architecture and **research on modern web technologies**.
- Collaborated with product teams to improve usability, maintainability, and scalability of interfaces.

SENIOR USER INTERFACE ENGINEER — BEMIND INTERACTIVE (REMOTE)

MAR 2016 — DEC 2016

- Senior UI engineer working on the **Hype product interface**.
- Developed scalable UI components and responsive interface patterns.

UX ENGINEER — CREATIWEB WEB AGENCY (TORINO, ITALY)

NOV 2012 — MAR 2016

- Researched and applied emerging frontend technologies and UI development patterns.
- Designed and maintained an internal UI framework used across multiple web projects.
- Coordinated technical implementation between designers and developers.

CEO & UI ENGINEER LEAD @ IMAGO LAB S.A.S., BIELLA, ITALIA

SEP 2011 — OCT 2012

- Founded and led a digital studio focused on **UX/UI design and web application development**.
- Designed interfaces and implemented frontend architectures for client projects.

OLDER EXPERIENCES...

2012 AND BEYOND

EDUCATION

Independent Study — UI Engineering & Design Systems

- Self-directed learning since age 16
- Self-taught in frontend development, UI engineering, and design systems.
- Independent study of JavaScript, React, CSS architecture, and modern UI frameworks.
- Continuous research on new technologies and ways to improve.

SKILLS AND TOOLS

LANGUAGES

JavaScript/TypeScript, HTML, CSS / PostCSS

FRAMEWORKS & UI ENGINEERING

React, Nextjs, Vue.js, Web Components, Shadow DOM, Motion.js (framer motion)

DESIGN SYSTEMS

Design Tokens, Theming, Component APIs, Documentation, Typography, Motion

DESIGN & PROTOTYPING

Figma, UI Design, Principle, Framer

ACCESSIBILITY

Semantic HTML, WCAG Accessibility

TOOLS

Git, Agents AI, VS Code

SKILLS

Mentoring, Technical Direction, Cross-functional Collaboration, Product Thinking

LANGUAGES

Italian

Native

English

Professional reading and writing proficiency
EFSET C1 Advanced (62/100)

As a self-taught person, I'm not particularly experienced in full-English companies. While I'm proficient in writing and reading English at a B2/C1 level, my verbal skills need practice. I'd be more than happy to improve them if I had the opportunity.

ACHIEVEMENTS & PUBLICATIONS

THE ADAPTIVE + RESPONSIVE MODEL ([LINK](#))

Published on Prototypr

- Developed and published a conceptual model describing how adaptive and responsive design strategies can coexist in modern UI systems.
- Explores scalable approaches for component-driven interfaces and multi-device design systems.
- Shared within the design and frontend engineering community.

MAKING WEB COMPONENTS FOR DIFFERENT CONTEXTS ([LINK](#))

Published on CSS-Tricks

- Technical article on building **context-aware Web Components** for scalable UI systems.
- Explores techniques for adapting components across **different environments and product contexts**.
- Focus on component architecture, maintainability, and reuse in large frontend platforms.

ACCESSIBLE ICON BUTTONS WITH MASKS AND SVG ([LINK](#))

Published on Prototypr

- Article focused on accessible UI component design using SVG masks.
- Demonstrates techniques for building accessible icon buttons compliant with semantic and accessibility standards.
- Combines frontend engineering and accessibility best practices.

HOBBIES AND INTERESTS

- Photography
- Gaming
- Nature walking
- Miniatures painting
- Coding
